

ReCraft

High Quality Golf Course Amenity Refurbishment

Golf Course Solutions, Inc. offers a way for you to focus on your “green assets” and still deliver the perfect product. The Golf Course Solutions, Inc. ReCraft process restores your amenities to a “Better Than New” luster at a fraction of the replacement cost. Proven nationwide by accredited Superintendents, the Recraft process painstakingly inspects each component, replaces or refurbishes each part, mends physical damage, and recoats all metal surfaces with an advance environmentally friendly finish. We offer one of the least costly solutions for enhancing the esthetics of your course, which helps you successfully delivering a superior product. Take the “Better Than New” challenge by calling Golf Course Solutions, Inc. today.

delivering a superior product just got easier...

- **Increase Customers Loyalty** by creating an esthetically pleasing environment. The National Golf Foundation has time and again illustrated that esthetics play a key roll in patronage. Golf Course Solutions, Inc. reduces the effort and expense of maintaining the esthetic qualities of your course by offering an economical way to restore the luster of your course.
- **Maximize Your Budget** using our budget friendly service. Superintendents around the nation have looked to Golf Course Solutions, Inc. to help reduce golf course amenity total cost of ownership. Our service has proven effective if your considering using internal talent or the purchase of new assets.
- **Empower Your Staff** to remain focused on the tasks that are with in their domain of experience. Using the ReCraft process is an economical way to restore the luster of your amenities and still keep your staff focused on your “green assets.” Instead of refocusing your staff on tasks that are inefficient and time intensive, Golf Course Solutions, Inc. can completely restore your amenities to a “Better Than New” luster in just a few short weeks.
- **Ecologically Friendly** process doesn't utilized solvents or compounds that are harmful to the environment. The ReCraft process utilizes an electrostatic powder coating process that contains and recovers all the materials that are used in the refinishing process. Our ecologically friendly process delivers an advanced surface coating technique that is beautiful, long lasting and environmentally sound.

After

Before

BETTER THAN NEW.

Powder Coated Tough and Beautiful. The ReCraft service utilizes a modern coating process that delivers the toughest most durable metal surface coatings available. Each unit is stripped of its former finish using an eco-friendly chemical stripping process to remove all previous coatings, methodical sandblasting technique that insures a superior bond, and then an electrostatic coating is applied in an environmentally friendly finishing center. By the way, during the coating process, all of our surface coatings are contained and recollected. This attention to detail lessens the impact on the environment and helps us deliver more value. All in all, we deliver the finest, most beautiful finish that's easy on the budget and the environment.

Each Component Painstakingly Evaluated. During the ReCraft service, each component of your amenity is painstakingly evaluated. Every component is either refurbished or replaced. Many of the parts used in the ReCraft service are original equipment manufacturers parts. Golf Course Solutions, Inc. has developed several innovative components that reduce the overall corrosive affects and increase the life span of your amenity. Our comprehensive examination and refurbishment process reduces the overall cost of maintaining your amenities and helps you find more money in your budget.

Broken or Damaged Metal Reworked. Believe it or not, severely damaged or broken amenities can be repaired. Our ReCraft service will repair broken or severely damaged amenity using advanced metal working technologies. We have taken amenities that many thought were scrap and delivered back a restored unit that looks "Better Than New." Our ReCraft service can restore the most deteriorated unit that would cost 3 times as much to replace.

ReCraft For All Your Amenities

Ball Washers. The Ball Washer is a frequently used amenity on the course and makes a critical statement about your product. We specialize in Ball Washers with 85 percent of the ball washers refurbished by Golf Course Solutions, Inc. being Par Aide™ products. However, the ReCraft process is available for Bayco™, Lesco™, R & R™, and Western™ ball washers. In each case, the ReCraft process utilizes original equipment manufacturer parts and advance surface coating techniques.

Tee Markers. Tee Markers are perhaps the most visible amenity and make a unique statement about your course. Don't let this amenity make a negative statement about your product. The ReCraft process utilizes a multi-step process to restore the "Better Than New" luster of your Tee Marker. Each unit is stripped of its former finish, specially prepared for coating, coated with an advance surface coating, line grained to uncover elevated markings, and clear coated with an advanced surface coating. This intensive process delivers a beautiful and remarkably durable finishes that will help you deliver a superior product.

Benches. Your Par Aide Benches can look better than new. Golf Course Solutions has developed the EverWare restoration kit for both the Par Aide™ Classic and Utility benches. We will refinish each bench end with our advanced surface coating to restore the "Better Than New" luster. Also, each bench is retrofitted with our EverWare restoration kit that includes EcoForm plastic coated slats and high-grade stainless steel tie rods. If your benches are hindering your ability to deliver a superior product, let us restore the appearance of your Par Aide™ Benches using our EverWare restoration kit.

Putting Cups. Every player of every round creates wear and tear on your putting cups. If your putting cups are chipped, faded, and looking their age, let Golf Course Solutions, Inc. bring back their purity. Our advanced surface coatings are specially designed for the rigors your Putting Cups endure.

Flag Poles. Being shot at every day can take its toll. Our advanced surface coatings are specially designed for the rigors your Flag Poles endure. Also, our team can help you select a custom color, design of stripe pattern that will dramatically change the look of your product.
